THE SUPPRESSED GLOVER REPORT. Millions on Millions of the Public Funds Stolen and Squandered-Fraud Absolute ly Unchecked and the National Finances

at the Mercy of Thieves and Robbers.

(Continued from Last Week.) At the San Francisco Mint there was a deficiency of \$235,000 in the Melter and Refiner's Office in 1856—a great discrepancy between the Treasurer's and the coiner's accounts in 1866, and large losses in 1870. The Superintendent was dismissed for corrupt practices in 1877. Losses were also discovered in 1870 at the Denver Mint and the New York Assay Office. The New York accounts wer passed by the Auditor's and Comptroller's offices of the Treasury without proper examination of the vouchers, which were paid by the New York Assistant Treasurer without the approval of the officers who should have received the

Supplies.
Up to 1870 the Director seemed never to have examined the New York Assay Office, and the mint regulations were hard to find there. The report of the Director of the Mint for 1877 says (in tables prepared by Martin V. Davis of Philadelphia) that the gold coinage under Director Lindeman, 1874-7 inclusive, was \$156,-000,000, and greater than that of any 000,000, and greater than that of any previous four years. This was untrue. The coinage of 1874-7 was \$166,000,000 (\$10,000,000 more), and that for 1851-4 inclusive was \$190,000,000, or \$24,000,000 more. The Director also fell into this error of \$10,000,000, and understated by this sum the total gold coinage of the mints. He also understated the gold coinage 1851-4 by \$1,600,000. He stated the total 1852-8 inclusive at \$233,000,000; but his subordinate, Mr. Davis, stated it in the same report, for the Philstated it in the same report, for the Phil-adelphia and San Francisco mints alone, at \$247,000,000, over \$13,000,000 more. Thus according to official figures two of the mints coined \$13,000,000 more than the whole five! The San Francisco mel-ter and refiner's returns of bullion above the amounts charged as delivered to him in the same report, thus making the mint \$36,000, 1854-77 is credited to that mint twice in the same report, thus making the mint expenses appear \$36,000 less than

The New York Assay office smelter and refiner, Mr. Andrew Mason, by great care and skill saved and turned in-to the Treasury in 1876-8 \$64,000 more than the bullion delivered him for treatment was charged at. These returns were suppressed from the Director's re-ports, being lumped with earnings, and Mr. Mason was instructed to return them as such, the motive announced in the instructions being to shield the mints from annoying inquiries as to why they, instead of returning a surplus like Mr. Mason, they charged the Govern-ment with a waste. Thus Mr. Mason was denied the credit he richly deserved and was in one report made to appear as wasting \$9,000, in order to hide the misgement of others. The letter ordering this suppression was signed as Acting Director of the Mint by Robt. E. Preston, who figures unpleasantly elsewhere in connection with cotton accounts. In 1876 Congress cut down the appropriations without authority from the Secretary of asked by the Director over \$300,000, but Lindeman contrived to smuggle in a cost about \$65,000 more than was pretenprovision allowing the earnings from sep-arating gold from silver, and from refining both, to be used in melting expenses without going into the Treasury. The ious to sell. result is that, every year since, the earnings have been spent in addition to the sums allowed by Congress, and \$300,000 yearly have been expended without Congress suspecting it.

The New York Assay Office receipts

from the sale of blue vitriol and sulphuric liquor in 1873 were stated by the Director there, at \$11,360.91. Four years later the annual report stated them as \$5,302.5. Both proved to be wrong; the amount was \$10,360.91.

The Director's annual reports for 1873-4-5 state the receipts aggregating \$2,046,000. The report for 1877 shows the same expenditures to be \$2,409,000, or over \$360,000 more than was acknowlor over \$500,000 more than was acknowledged at the time. The expenditures are shown by the yearly reports for 1873-6 inclusive as \$5,062,000. The report for 1877 shows them to be \$5,635,000 or over \$570,000 more; \$306,000 of this suppression was in 1876, the presidential election year. Of more than half this \$572,000 suppression there is not the shadow of an explanation. In 1876 the items of expenditure were suppressed from the annual report.

In the spring of 1869, 311,400 bars of silver and gold bullion, whose value was unknown, were deposited in the New York Assay office and moneys were loaned thereon to Bailing & Sarder and others by Assistant Treasurer Van Dyck. This was very dangerous, for gilded bars of lead or iron could thus be used to borrow on without interest or security. At least one lot of boxes said to contain bullion were deposited and borrowed on in 1869, and taken away on return of the loan without any inspection or test. This practice was broken up in 1869 by George W. Edelman, Deputy Treasurer of the Assay Office; but it was revived the year after Mr. Edelman resigned by Director Lindeman, concerning "British bars and sovereigns," whose genuineness had not been tested; and it continued till the Glover investigation began, when Lindeman stopped it.-From 1866 to 1870 the New York As-

say office made 338 such loans, and in many cases the borrowers returned the coin and took bars, leaving the Govern-ment to pay for coining the bullion de-

posited to obtain the bars.

In 1878 the Superintendent of the San
Francisco mint sent L. Von Hoffman &
Co. checks for \$1,023,000 under instructions from Lindeman, when but \$600,000

worth of their silver had been assayed. Superintendent Acton of the New York Assay Office has been in the habit of signing checks in blank and leaving tions seeking to discredit Mr. Glover's statement about his Bureau. In this letthem thus in the Paying Clerk's possession. Last year eighty-two blank checks were found in the office with Acton's signature. This is a virtual desertion of his duty by Acton, for he cannot know the cannot his clerk's action nor supervise his payments. A rogue in the paying clerk's place, or a thief getting into the office, reau bookkeeper swore that there could not possibly be a mistake in the recould fill up a check for a million, and it might be collected and the parties disapport; yet examination showed that the pear before detection. If necessary the clerk's countersignature could be forged. customs cigar stamps were delivered more than the Bureau claimed to have made! Superintendent Dunning, Acton's predc-The distinctive paper for printing the Government issues has been stored in a room used exclusively for that purpose cessor, repeatedly got checks made to his own order for sums due public creditors. Then he indorsed the checks to the creditors and turned in their receipts with the vouchers afterward. After a time he grew slow about turning in the vouchers and one day it was discovered that he had collected \$13,000 of these checks that is, it has been added to and drawn from since 1869, and there has always been

Lindeman employed more than a score

months' service. The law does not allow traveling expenses to any one but note, funded loan bond, and old fraction-the Director; to October 1, 1873, he re- al currency paper; of the latter, part is beceived \$4,300-charged to this account. Frank H. Gassaway, a man of notorious character in Washington, received \$1,-668.73 for taking an inventory (16 pages of foolscap), of furniture and fixtures at the San Francisco Mint. At the close of the Lindeman investigation the subbasement of the building; the corridors leading thereto are poorly of that mint in 1877, but before the report was made, the Superintendent, La Grange, who was removed in consequence of that investigation, presented Lindeman's wife with \$1,000, saying it was a any one of the six can open packages of man's while with \$1,000, saying it was a present from the employes of the mint. Some of the employes, it is said complained afterward that they were compelled to contribute and could ill af-

When Prof. Robert A. Rogers, of Philadelphia, E. O. Leech of the Mint Budrawal of small quantities at a time, become in the end a dishonest possessor of a large stock of this paper. No surveilreau, Washington, and A. W. Dowing, Chief of the Coining Department of the Philadelphia Mint, were sent to San men, and the theft would remain undis Francisco to examine and attend the yearly settlement of the Mint, Lindeman instructed Superintendent La Grange to pay their traveling expenses and \$10 a day to Rogers from the profits of frac-tional silver coinage. Before the Glover Committee he swore that he had never used these profits thus, but the record

the committee he had called these \$25,-

000 "very moderate means" of his wife's. In March, 1875, he bought of the Con-

solidated Virginia Dore silver bullion,

valued by the sellers at \$1,023,000, and

paid them \$1,000,000 on account without waiting for the assay to show whether it

was correctly valued, or 98.3 per cent.

of the value as afterward ascertained.

The company got their money two

months before completion of assay, and were thus enabled to make \$15,000 in-

terest. In June, 1875, he bought of them imported silver bars valued by them at

\$1,500,000, and paid them \$1.425,000

down over two months before completion

of assay, and enabled them thus to make

\$25,000 interest. The assay showed the bullion worth but \$1,437,000 or \$63,000

San Francisco. The express charges

Virginia, the sellers, was employed by

Lindeman to make an "examination

of making the payment. William E. Dubois, Assayer at Philadelphia, pro-

tested strongly against "correcting" as-says at the instance of outside parties,

saying that this destroyed the reliability

ded. In the same month Lindeman also took off the Company's hands nearly \$2,-000,000 more silver that they were anx-

January, 1875, the Bonanza stocks,

der the effect of wild reports about the mines, were very high in price. Consoli-dated Virginia reached 850. Lindeman's

\$25,000 worth of stock was worth once \$200,000. But it fell by October to 210

and California, the other part of the Bo-

nanza, to 250. So it was bulled again. In the summer of that year Lindeman visited California on official business, sought a conference with the managers

of the mines, and arranged an inspection

of them. He and Prof. Rogers then or

soon after, a holder of \$20,000 or more

stock in these mines, inspected them twice. Rogers made a report valuing

them at \$300,000,000, which Lindeman,

States Monetary Commission. The maintenance of the stock at high prices

enabled the owners to sell stock enough to realize about \$125,000,000,

and the fall caused the buyers to lose about \$100,000,000, which the first sell-

ers pocketed by Lindeman's aid. This

spread misfortune and distress through-out the Pacific coast.

Oct. 19, 1877, the Secretary of the Treas-

ury signed at Lindeman's instance an order stopping the coinage of trade dol-lars. Lindeman managed to let the Nevada Bank of San Francisco, owned

by the Consolidated Virginia party and the Anglo-Californian Bank, know of the

after that the suspension would drive all the silver bullion in market to the Neva-

da Bank refineries; but this had no effect on Lindeman.
O. H. Irish, Chief of the Bureau of En-

ter he stated that the Bureau had com-

oleted and delivered to the Comptroller of the Currency 2,390,000 sheets of na-

tional bank notes in the fiscal year 1878:

but the report of the Bureau shows that

it delivered 32,000 sheets more. The Bu-

report represented that 310,000 sheets of

May 1, 1877, there was stored in this

large quantity on hand.

convicted him.

supply exhausted.

What has been said of the paper, applies also, only with a still greater force to the custody of the dies, rolls, bed pieces, and plates from which the securities are printed in the bureau. The purloining of these is especially to be guarded against. The Government has not placed such checks upon them as to Lindeman bought in his wife's name, not placed such checks upon them as to in 1874, 150 shares of the California and 125 shares of Consolidated Virginia, the "Big Bonanza" silver mines of Nevada, which were controlled by Flood, O'Brien, render their abstraction impossible, nor can they, by the present arrangement for doing the work. A bed piece is a plate of steel the size Mackey and Fair. For these he paid 90 per cent. or less, about \$25,000. Before

of the note or coupon, etc., to be printed, having the entire of such note, etc., er graved on its surface, and this being finished, the piece is hardened.

A roll is a small cylindrical piece of

ing used for national bank notes and

legal tenders. It was found that the stock of paper had been counted but once (about five years ago) in ten years.

corridors leading thereto are poorly lighted, and seldom visited, except by

workmen employed in shops on the same

floor. Six persons have access to this room

time and place the bundles so tampered

A man so disposed may, by the with-

lance is kept on the movements of these

covered till a count was made or the

at any time during working hours, and

entire engraved work that is on the sur-face of the bed piece; this also, after receiving the impression, is hardened. It is made while the steel is soft by being run over the hardened bed piece, so that the entire engraved work on the surface of the bed piece is transferred to its outside surface by pressure.

The plates are large pieces of steel

from which the notes bonds, stamps, etc., are printed, and vary in size from that of four notes, each, as legal tenders, to a coupon bond, and are made by having the work from the roll transferred to their surface by pressure. There are three (3) bed pieces (also called dies) short of the valuation, so that he paid them in advance 98.6 per cent, of the value, running a great risk of the overpaying. The bullion was paid for at \$1.21½ per ounce fine metal, delivered at \$1. and three (3) rolls, from which the plates for each denomination of notes are made viz: one for the green printing on the back, one for the red seal.

Thou seekest vengeance upon man, the most happy results. No better strike me. Misfortune is converted into happiness by the sweet thought or after taking Quinine. We would Heretofore, to insure security, it was

San Francisco. The express charges were paid by the Government to New York from the profits on fractional silver coinage, instead of being paid by the sellers, and the charges at the Assay Office were borne by the Government, without authority of law. These expenses amounted to \$32,000, which made the deemed necessary to have these separate dies, etc., and the several printings on without authority of law. These expenses amounted to \$32,000, which made the silver cost the Government \$1.26 per fine ounce. The market value was \$1.24.3 so that the purchase, as well as costing \$32,000 more than Lindeman pretended, cost \$13,000 more than it could have been bought for elsewhere. Lindeman also directed Superintendent Acton to pay \$9.000 more than the assayed value. pay \$9,000 more than the assayed value of the gold in the purchase, the sell-ers claiming that the assayers had made a "mistake." Acton replied that there duties they go in and out at pleasure, and there is no difficulty securing for unlawful purposes the bed pieces from which the back, the face, and the seal of any denomination of notes, from seal of any denomination of notes, from one dollar to one thousand dollars, or all will not be for me a long remorse. Then was no authority to pay it, but at Linde-man's direction, after seeking to throw all the responsibility on Lindeman, he paid, and charged it to "profit and loss." Prof. R. Rogers of Philadelphia, an-other stockholder in the Consolidated

use after the roll has been made, the set | and my innermost thoughts shall never and of course reported strongly in favor of three could be conveniently carried in an inside pocket, and as the preparation of a roll requires but a short time, these bed pieces could be taken away at the close of work, and restored in the morning, until one of each denomination had of assays. The payment was hidden in the Director's annual report for 1877, by calling it a "wastage," when no wastage but \$14,000 saving, had occurred. The been obtained, and by them plates pre-pared for printing millions of dollars of genuine notes. The vault containing this material has often been left open payment took place without the knowledge of the New York Paying Clerk, and without authority from the Secretary of and accessible for hours at a time to any one who could get into the Bureau. It is strange that each of the last three

Presidential elections has been followed by a Treasury announcement that large amounts of "counterfeit" notes were afloat. In 1869 the whole issue of legal afloat. In 1869 the whole issue of legal tenders was withdrawn and replaced, on the ground that they had been largely the ground that they had been largely the stand. Persons stopped to examine REMARKABLE CURE OF SCROFULA, &c. the ground that they had been largely and skilfully counterfeited. In 1873 the ling around it. Half of the length of ling around it. Half of the length of whole issue of \$500 greenbacks—about \$35,000,000—was withdrawn and replaced in the same way. In 1877 a counterfeit \$1,000 note was announced. One of the oldest engravers in the country testifies that when a note is so like the original that it cannot easily be detected-as these and other "counterfeits" are said by Treasury officials to be-it cannot really be a counterfeit, but must be a genuine note surreptitiously printed from genuine plates, or from secret reproductions of these plates. Other experts testify that a genuine plate, after being secretly made, can be altered with a graver in small details enough to make it seem counterfeit to any non-expert. In 1865 Hank Hall, a noted counter feiter in New York, hired two plate printers named Lankton, to go to Wash-

saying that other estimates were too high, concurred in and published in his annual report for 1875. This was widely circulated and jumped Consolidated Vir-ginia to 435 and California to 375. The rise ington, get employment in the Printing carried Lindeman's stock up to 120,000 and his official representations held the Bureau, and there steal copies of every note plate the Government was using stock up to 180 per original share to the end of 1876, and to 115, till the end of They did steal copies (by printing on lead sheets instead of paper) of several 1877. The mines only produced about a notes, and could have stolen all had not sixth of the amount represented, and the stock fell in value about \$15,000,000, according to the Statistician of the United

a quarrel sprang up.
A brief inspection of the Treasurer's books revealed the fact that \$19,000,000 of notes were at one time secretly affoat for several months, the Treasury statements being false during that time to that extent; and the fact of that secret issue remained unknown till lighted on by the Glover committee. The books were falsified, and a balance forced to conceal this secret issue, by untruly stating that \$19,000,000 had been deposited as temporary loan, when no such deposit took place.

From 1867 to 1873, while the amount of greenbacks authorized by law was \$356,000,000, the Treasurer's books revealed the fact that repeatedly the amount afloat was \$2,000,000 above the authorized amount in the middle of the suspension the same day, though the public did not know it till the next. month, enough being turned over for de-The second business day after the sus-pension the price of trade dollars had to bring the total down to \$365,000,000, struction on the last day of the month risen 4 per cent., and these banks, having had notice, had bought up the dollars and compelled traders with China to the published figures in the middle of buy of them at this higher price. Ex-Gov. Low telegraphed Lindeman soon unissued notes on hand on the last day to make up the sum to the lawful figure

on statement day.

Gen. Spinner swore that the public debt statements did not agree with his books; that he did not approve of them; graving and Printing, published last that his name was put to them without winter a letter to Mr. Atkins, Chairman of the House Committee on Appropriatory to publish truthful statements; that to publish truthful statements; that balances were forced in these statements and that he finally got the law changed so as to relieve him of the duty he was

not allowed to perform.

In nearly the whole of the fiscal year 1866, the Treasurer's books show that the amount of compound interest notes outstanding was from \$5,000,000 to \$14,-000,000 more than the published debt statements showed. One month it was \$26,000,000 less. Three different statements of the sum outstanding June 30, 1865, were published, differing many millions, and none of the three was true.

Secretary McCulloch publicly acknowl-

edged some years since that on one occa-sion he caused \$4,000,000 withdrawn is stored in that room. The supply for legal tenders has never been exhausted, on hand."

Sectioners, that had been paid off and were to be destroyed, to be counted and published in the debt statement as "cash that is, it has been added to end destroyed." greenbacks, that had been paid off and

the destruction of withdrawn notes, Charles H. Cornwell, Chief of the Refices, attending annual settlements, and assisting him in doing so, for which he spent in four years over \$11,000. He paid his son, 19 years old and not in the public service, \$2,755 for less than six in the service of present in four years over \$10,000. The second public service, \$2,755 for less than six in the service of the service

beside a large amount of national bank ing a false certificate of destruction of \$40,000 worth, and Gen. Spinner, Secre taries Boutwell and Bristow, and others persistently refused to investigate th matter, though about \$800,000,000 of notes had passed through Jones' hands in perfect shape, much of it never even having been issued. The checks and precautions against theft in destruction are found to have been grossly neglected and disregarded in many respects. Gen.

Spinner swore that "they have a rule that nothing must be divulged that takes Hepatitis, or Liver Complaint,

place in the Treasury."

The report concludes by stating that this paper that have been counted and stored, abstract from 50 to 100 sheets at a much more investigation; that by no other method can the people learn the truth about the Government, or Congress get the information necessary to legisla-tion; that the Treasury is full of oppor-tunities for wrong that have doubtless been largely used; that that as well as other Departments is run by a Ring; that the Government has far too much to do to do it honestly or well, and that only by wholesale cutting down of Govern despotism and national ruin be escaped. Remarkable Prayer of the Late Prince

A prayer in the handwriting of the Prince Imperial has been found among papers in his desk at Camden Place. It is published by the London Morning Post, which adds: "The elucidation of his high character alone justifies the publication of a sacred document, which will prove to the world how intimately he was penetrated with all the feelings which most become a Christian, and A roll is a small cylindrical piece of steel having on its surface, in relief, the entire engraved work that is on the surtory life." The following is a transla-"My God: I give to Thee my heart, but give to me faith. Without faith

my path, but that Thou mayst permit me to overcome them. I pray not that have occurred where few of them ex-Thou shouldst disarm my enemies, but isted, yet examination of the body. that Thou shouldst sid me to conquer myself. Hear, O God! my prayer. Preserve to my affection those who are dear to me. Grant them happy days. If Thou only givest on this earth a certain sum of joy, take, O God! my share, and bestow it on the most worthy, and may the most worthy be my friends. If that those whom we love are happy.

Happiness is poisoned by the bitter thought, while I rejoice those whom I love a thousand times better than that which is given by a tranquil con-science. O my God! show me ever where my duty lies, and give me strength to accomplish it always. Arrived at the term of my life, I shall turn my looks of them, are printed, and make from them rolls (an operation of but a few minutes), by which an unlimited number of plates can be prepared.

These had piece are acceptable in the conviction that those whom I love, and who are dead, shall see all my actions. These bed pieces are rarely called into My life shall be worthy of their witness, make them blush."

> A WHALE THRESHER .- The schoone Martha, from George's Banks, brought, with a cargo of fish to this port yesterday, the largest whale thresher remembered by old market men to have ever been seen in this city. It was caught in a pound net at Wood's Hole, Mass., on Tuesday, and was killed with a lance. The last one exhibited in Washington market was fifteen years ago, and it was so small a specimen of its kind that some fish dealers believed that it was a Delight.
>
> A. F. MÉRRELL & CO., Phila., Pa. Pemberton's Stillingia or Queen's Delight. species of shark. The fish that arrived yesterday was exhibited by C. A. Lewis. It was very nearly fourteen feet long, the curious fish was body and the other half tail. The tail tapered off gradually, and had been looped up by a rope attached to a beam above. The weight of the creature was 600 pounds. The naked skin on the back and sides was a uniform bluish drab color from the snout to the tip of the tail. The tail was as much a separate part of the body as a dog's tail is of its body, which appearance made it resemble a land or amphibious animal more than a fish. The eyes were as large as a cow's, and could be rolled in their sockets. The mouth was comparatively small, and the teeth short, sharp and of a uniform length in both jaws. Sticking straight up from the middle of the back was a dark fin, eleven inches long, of the same color as the body, tough and compact, yet neither bony nor hard. The fish yielded like caoutchouc to the finger, but on releasing the pressure the skin sprang back to its original form. The body from end to end, seemed a mass of cartilage. The long tail is used by the animal like a rawhide in attacking its enemy, the whale. It forms a sort of alliance with the sword-fish, the latter thrusting its sword into the whale from below, and the thresher attacking it from above. The threshers run in schools, and from ten to twenty will attack a whale at once. Those who have witnessed a combat between threshers and whales say that it is an exciting spectacle. The water flies in showers of foam in all directions, as the threshers hurl themselves at the whales like animated cowhides. For hours they rain blows on the head and sides of the huge animal. Between the piercing thrusts of the swordfish and whale rarely escapes. From the carcas the victors get their food for many a day afterward. Through the little slit in the side of the thresher exhibited yesterday oozed blood as red as that of a land

animal. The gills were four in number on each side.—New York Sun. FAITH.-The following is an incident on he recent return of some British officers from Afghanistan: Scene-The wildest part from Algnanssau

BROS. on the wrappers.

Insist upon having the genuine Dr. C.
MCLANE'S LIVER PILLS, prepared by Fleming Bros., of Pittsburgh, Pa., the market being full of imitations of the name McLane, spelled differently but same pronunciation.

YELLOW FEVER-BLACK VOMIT. It is too soon to forget the ravages of this terrible disease, which will no doubt return in a more malignant and viruleat form in the fall of 1879.

MERRELL'S HEPATINE, a Remedy discov... ed in Southern Nubia and used with such wonderful results in South America where the most aggravated cases of fever are found, causes from one to two ounces of bile to be filtered or strained from the blood cach time it masses through the Liver, as long as an excess of oile exists. By its wonderful action on the Liver and Stomach the HEPATINE not only prevents to a certainty any kind of Fever and Black Vomit, but also cures Headache, Constipation of the Bowels, Dyspepsia and all Malarial diseases.

No one need fear Yellow Faver who will expel the Malarial Poison and excess of bile from the blood by using MERRELL'S HEPATINE, which is sold by all Drugglists in 25 cent and \$1.00 bottles, or will be sent by express by the Proprietors, A. F. MERRELL & CO., Phila, Pa. It is too soon to forget the ravages of this terri-

The reports of wonderful cures of Rheumatist Scrofuls, Salt Rheum, Syphilis. Cancer, Ulcers and Sores, that come from all parts of the country, are not only remarkable but so miraculous as to be doubted was it not for the abundance of proof.

Case of Col. J, C. Branson.

KINOSTON, GA., September 15, 1571.

GENTS—For sixteen years I have been a great sufferer from Scrofula in its most distressing forms. I have been confined to my room and bed for fifteen years with scrofulous ulcerations. The most approved remedies for such cases had been used, and the most eminent physicians consulted, without any decided benefit. Thus prostrated, distressed, desponding, I was advised by Dr. Ayer, of Floyd County, Ga., to commence the use of your Compound Extract Stillingia. Language is as insufficient to describe the relief I obts-ined from the use of the Stillingia as it is to convey an adequate idea of the intensity of my suffering before using your medicine; sufficient to say, I abandoned all other remedies and continued the use of your Extract of Stillingia, until I can sav truly, "I am cured of all pain," of all disease, with nothing to obstruct the active pursuit of my profession. More than eight months have elapsed since this remarkable cure, without any return of the disease. For the truth of the above statement, I refer to any gentleman in Bartow County, Ga., and to the members of the bar of Cherokee Circuit, who are acquainted with me. I shall ever remark, with the deepest gratifude, your obedient sevenatin, with the deepest gratifude, your obedient sevenatin. Case of Col. J, C. Branson.

deepest gratitude, your obedient servant, J. C. BRANSON, Att'y at Law.

MIRACLE.

WEST POINT, GA., Sept. 16, 1870.

GENTS—My daughter was taken on the 25th day of June, 1863, with what was supposed to be Acute Rheumatism, and was treated for the same with no success. In March, following, pieces of bone began to work out of the right arm, and continued to appear till all the bone from the elbow to the shoulder joint came out. Many pieces of bone eame out of the right foot and leg. The case was then pronounced one of White Swelling. After having been confined about six years to her bed, and the case considered hopeless, I was induced to try Dr. Pemberton's Compound Extract of Stillingia, and was so well satisfied with its effects that I have continued the use of it until the present. My daughter was confined to her bed about six years before she sat up or even turned over without help. She now sits up all day, and sews most of her time—has walked across the room. Her general health is now good, and I believe she will, as her limbs gain strength, walk well. I attribute her recovery, with the blessing of God, to the use of your invaluable medicine.

With gratitude, I am yours truly,
WEST POINT, GA., Sept. 16, 1870. A MIRACLE.

r hours they rain blows on the head I sides of the huge animal. Between piercing thrusts of the swordfish and flail-like blows of the thresher, a ale rarely escapes. From the carcass victors get their food for many a day rrward. Through the little slit in the

BRADLEY'S PATENT PHOSPHATE COMBAHEE ACID PHOSPHATE.

WE are agents for the above celebrated Fertilizers, having sold Bradley's Patent for several years, we know it to be good. As to the ACID there is none better. See Mr. B. A. Davis' certificate attached. Could give more, but one is sufficient. Our terms are as favorable as any Standard Guano. Give us a call before buying.

A. B. TOWERS & CO.

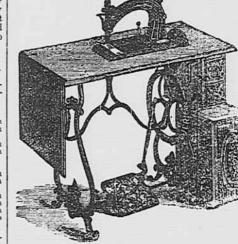

ANDERSON, S. C., Sept. 30, 1878—Messrs. A. B. Towers & Co.—Dear Sirs: I beg leave to say to you that I am well pleased with the Bradley's Gusno that I bought of you last Spring. In fact I do not think there is any other guano equal to it except perhaps one other, and there is no man who has used a greater variety of fertilizers than I have. I shall want it again, and a great many of my neighbors expect to use it next year, just from seeing my cotton.

21 from seeing my cotton. Feb 13, 1879 31
